

Privanova
RESEARCH & CONSULTING

Privanova is part of the POLIICE: a multidisciplinary R&D project funded by the European Union as a part of Horizon 2021 programme.

POLIICE addresses the challenge of technological innovation outpacing law enforcement in combating cybercrime. It reintroduces lawful interception techniques that strike a balance between effective crime-fighting and respecting privacy and data protection rights. As new criminal activities thrive in the digital realm, POLIICE focuses on bridging the gap and empowering law enforcement agencies to keep pace with these innovative threats.

This project has received funding from the European Union's Horizon 2021 research and Innovation programme under grant agreement N° 101073795

POLIICE

Powerful Lawful Interception, Investigation, and Intelligence.

Budget

€ 4 202 787,50
From Oct. 2022 to Sep 2025

Consortium

20 Partners from: France, Poland, Israel, Andorra, Greece, Sweden, Spain, Czech Republic, Belgium, Germany, Estonia, Romania and Denmark.

Privanova's role

Privanova actively organizes workshops and ensures compliance with ethics, privacy, and data protection frameworks.

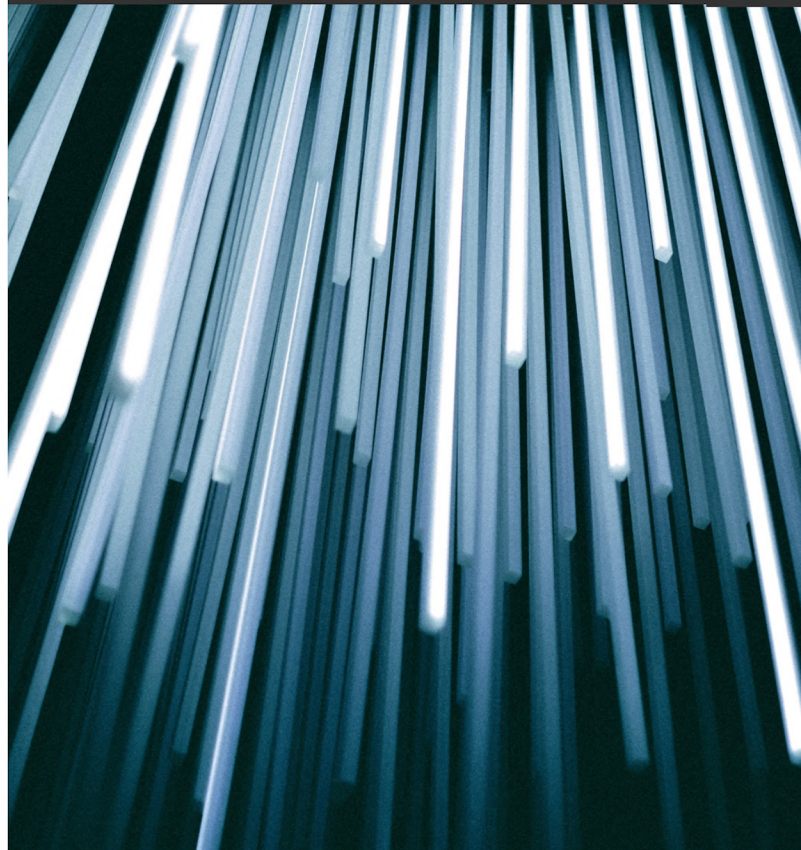

We lead compliance management, providing crossfunctional assistance in the ethical and legal use of personal data and maintaining the project's Data Management Plan.

Additionally, we contribute to clustering activities in POLIICE, aligning with our involvement in innovation projects like TRACE, CYBERSPACE, and CC-DRIVER.

Moreover, Privanova focuses on maximizing the project's exploitability and sustainability, reflecting our commitment to prolonging impact and public interest in our projects.

Impact

POLIICE raises the ambition of fostering a new era of lawful interception that would allow the interested LEAs to successfully detect, investigate and deter these proliferating forms of cybercriminality.
